Welcome

We distribute an extensive, growing line of trailer parts and hitches from our warehouse located 40 miles east of Harrisburg, PA. Our goal is to stock what you need for your customers and to ship your orders promptly.

Learn to Know Us

We are a wholesale distributor selling to trailer manufacturers, trailer dealers and repair shops. Our price levels are based on your annual purchase volumes. If you build trailers, sell trailer parts or install hitches, please give us a call to discuss wholesale pricing.

Do you install or repair? Sorry, we don't install or repair, but we have numerous dealers that will do it for you. Please give us a call. If one of our dealers will be installing for you, we encourage you to buy your products directly from that dealer.

What are your hours? We are open Monday through Friday, 8-12 and 1-5.

Our Mission

We are a family-owned business that values our relationship with you. Our mission is to provide customer service that exceeds the acceptable standards of our time. We appreciate the opportunity to serve you!

Thank you,
The Weaver Distributing Team

Calculating Ball Mount Drop Needed

1. Measure distance from ground to top of receiver tube opening.

2. Measure distance from ground to bottom of trailer coupler. Trailer must be level.

3. Subtract trailer coupler height from receiver tube height to calculate amount of ball mount drop needed. (Opposite for rise) (Be sure to figure in the vehicle sag that will occur when trailer tongue weight is applied to vehicle)

WHAT IS E-Z LUBE®?

THE E-Z LUBE SYSTEM CONSISTS OF AXLE SPINDLES THAT HAVE BEEN SPECIALLY DRILLED AND ASSEMBLED WITH GREASE FITTINGS. WHEN GREASE IS PUMPED INTO THE FITTINGS, IT IS CHANNELED TO THE INNER BEARING, THEN TO THE OUTER BEARING, AND EVENTUALLY BACK OUT THE GREASE CAP HOLE FOR A COMPLETE BEARING REPACK. THE PROTECTION AND MAINTENANCE FEATURES OF THE E-Z LUBE SYSTEM MAKE IT IDEAL FOR MOST TOWABLE AXLES. E-Z LUBE IS DESIGNED TO ALLOW FOR IMMERSION IN WATER.

E-Z LUBE equipped axles are subject to the maintenance and inspection procedures regarding brakes, hubs, bearings, seals, wheels, and tires as outlined in Dexter's current Operation Maintenance Service Manual (available for download at www.dexteraxle.com).

Use only LITHIUM COMPLEX NLGI CONSISTENCY #2 GREASE. Other types of grease may not be compatible.

E-Z LUBE SYSTEM

E-Z LUBE FEATURES

- Trailer axle lubrication made simple
- Easily purges contaminated grease without removing the hub
- Allows grease to easily flow to both the inner and outer bearing
- No disassembly required, just attach a grease gun at the spindle end and inject the grease
- E-Z LUBE cap allows for easy access, extra protection, and virtually no mess
- Ideal for most towable axles up to 8,000 lbs.
- E-Z LUBE is designed to allow for immersion in water
- Five-year limited warranty
- ISO 9001:2015 Certified Production Environment

Difference between waterproof and submersible?

- Waterproof lights are sealed and will not let water inside.
- Submersible lights are designed for submersion and have a drain hole at the lowest point.
- Please make sure your wiring connections are sealed so water cannot get in through the wires.

Weight Distributing Systems

What is it and do I need it?

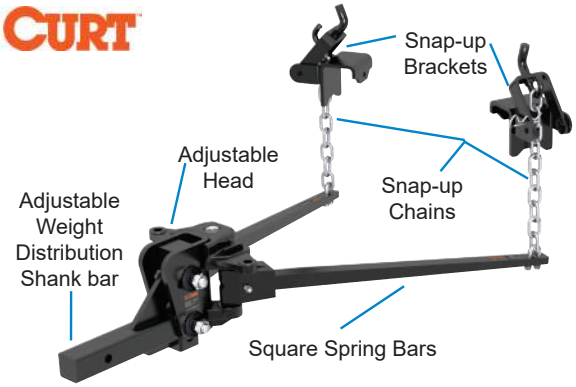

Common Question

Weight distributing hitches distribute the tongue weight between trailer and towing vehicle. Tongue weight is the weight pressing down on the ball.
Too much tongue weight causes the vehicle to squat which hinders safe steering and can cause your vehicle to "bottom out." See illustration.

See page 57

Round or Square bar style?

Trunnion square-bar style requires about 3" less clearance than round- bar, making it an ideal option for SUV's & vans or traveling uneven terrain. Also Trunnion style holds temper better than round giving a more durable system.

Weight Distributing Shank Bars

- Designed to fit both round and square bar heads
- Can be flipped to provide drop or rise
- ¾" bolt holes are spaced 1¼" center to center
- Head and bolts are sold separately on page 174

How do I choose a shank bar?

1. Calculate the amount of drop or rise you need. Please see the diagram on page 6.
2. Determine if you are using a round-bar or trunnion square-bar weight distributing system. See page 174.
3. In the chart below, find a shank bar that closely matches the amount of drop or rise you need.

Why use a Sway Control unit?

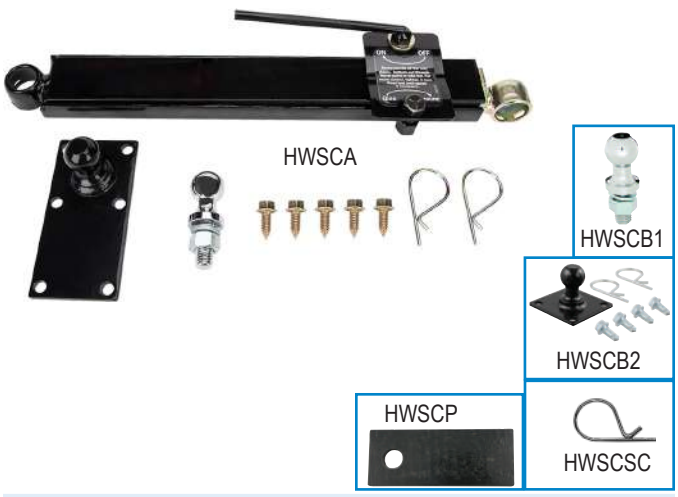

Common Question

Trailer sway is a problem when there is not enough or too much tongue weight. Sway is worsened by strong cross winds or turbulence from passing semi-trucks. Large or heavy and broad-sided trailers may require the use of 2 sway controls.

A sway control is also recommended with use of a weight distributing system.

Timbren Suspension

TIMBREN

Looking for a reliable helper spring?
It's time you consider using Timbren SES suspension upgrades. The Aeon® hollow rubber spring is the heart of the Timbren SES suspension upgrade.

Why rubber springs?
In many ways, Aeon® hollow rubber springs are superior to all other suspension helpers. In fact, Aeon® rubber springs are stronger than steel and more reliable than air!

See for yourself how Timbren SES upgrades will give you precisely the capacity and the ride quality that you need to keep your vehicle level and stable.

SOLVING PROBLEMS

Trailer Sway

Control Trailer Sway - a condition which sometimes occurs with unbalanced loads, in crosswinds or when passing heavy trucks. **Timbren *SES*** stabilizes your vehicle.

Rough Ride

Improve the Ride by allowing the Aeon® hollow rubber springs to absorb road shocks and bumps. Towing a trailer doesn't have to mean poor ride quality.

Suspension Sag

Eliminate Suspension Sag when towing a heavy trailer. **Timbren *SES*** extends the life of your suspension and helps to avoid bottoming out.

Body Roll

Control Body Roll during cornering with powerful progressive rate rubber springs which resist lean and enhance vehicle stability.

SuperSprings Suspension

- Handmade from micro-cellular polyurethane
- Reduces G-force in your towable by 68%
- Designed to remove sway, hop, & body roll while increasing overall driver control and comfort while towing

WD ratings for receiver hitches are listed first and WC ratings second. If only one rating is listed, it is a WC rating. Hitches with only a WC rating are not designed to be used with a weight distributing system.

TW ratings are usually 10% of the WD & WC ratings unless noted in blue in the Vehicle column.

Electrical Connector Kits
Year ranges may differ from the year ranges for receiver hitches.

Kits provide 4-pin flat connector unless noted. See page 150 for Part 2 adapters.

Call (717) 865-7440 for help to select your hitch. Many more custom-fit hitches are available.					WD / WC					

Kit Type
Always check the Code* column

Codes are explained in the footnote box at the bottom of every spread.

Abbreviations
TW: Tongue Weight
Pounds pressing down on the hitch ball
GTW: Gross Trailer Weight
Total pounds of trailer and load
WC: Weight Carrying
GTW if using a standard ball mount
WD: Weight Distributing
GTW if using a weight distributing system

Check your vehicle owner's manual for towing capacity ratings and other special warnings or advice. Never exceed your vehicle manufacturer's stated towing capacity.

WARNING
Never modify any piece of your towing system. Failure to heed warning may result in serious personal injury or death, vehicle crash, and/or property damage.

Cab & Chassis Trucks have MANY variables! We CANNOT guarantee a fit.
Measurements available upon request

- Bumpers can be lower, higher or extend farther from the rear of vehicle
- Frames can be shortened or lengthened and spring hanger brackets can be in different locations
- Custom beds and after-market items can interfere
- Auxiliary or rear fuel tanks can interfere

Schuck Cushion Hitches

Built with a lifetime of service in mind. The Schuck Cushion Hitches contain injection molded Urethane Cushions to absorb thrust shock and a high density Polyethylene Bearing to increase tongue load. Cushioning reduces wear on the entire drive train of the truck, increases gas mileage through the reduction of jerk, and greatly reduces driver fatigue.

We recommend the 300 series for towing mostly empty wagons with very little tongue weight. The 700 series has twice as many cushions and bearings and works well for full wagons or applications with a good bit of tongue weight. The 800 series is super heavy duty! Applications include fertilizer dealers, tractor draw bars, and implements with excessive tongue weight.

Light Duty Cushion Hitch

- Similar to 740 with ½ as many cushions
- 1" tongue hole
- ⅝" pin and clip included
- Fits most class 3, 4, & 5 receiver hitches with a 2" square opening
- 2⅝" drop (may also be used in rise position)

HC340	340 model, 20,000 GTW, 500 TW	$425.00
